

REVISION TO PESTICIDE CLASSIFICATION REGULATIONS

SUMMARY

The changes to these regulations will accomplish the following:

1. Require commercial pesticide applicators to maintain written documentation of application equipment set up for reference by Plant Board Inspectors.
2. Reduce the current four (4) buffer zone between cotton and the field of application for aerial application of 2,4-D between April 15 and September 15 to two (2) miles.
3. Allow consenting growers to waive the buffer zone requirement
